Assignment 2: Group Assignment

Submission date: 2026-05-31 23:59

(Note! Intermediate presentation: 2026-05-19)

Assignment 2 is a group assignment, i.e., a group of ~3 students must work on the tasks below creating a report. The assignment is mandatory. Not delivering it will result in failing the course. Delivering it late may result in reduced grades.

Background

Phase 1 (done in Assignment 1)

Imagine you are a group of computer science students. You had this great business idea, and early tests were positive. You documented your idea in a lean canvas or business model canvas and validated the three most important assumptions. Furthermore, a scenario analysis turns out positive. You have a real opportunity here and you decide to try exploiting it.

Phase 2

To get more formal and apply for funding you need to start a company and join an incubator (Task 1.-6. Below).

Phase 3

As you join the local incubator, coincidentally, an investor hears about your idea and the person invites your group to present it in a competition where the winner might get enough funding to implement the idea (more than the incubator could provide as funding).

You choose to accept and are now preparing a Pitch deck to convince the investor to choose your idea and team.

Tasks

To be able to apply for start-up funding by local incubators, they require you to start a company. Therefore, **pretend** to start a company.

1. Read up on the process at: <https://bolagsverket.se/en>
2. Download the company registration form from:
<https://www.bolagsverket.se/download/18.46f4138717c599ee403aa2d5/1638951395259/816.doc>
3. Fill in the registration form. Use fake names, etc. for personal data, but be as realistic as possible regarding business activities, etc.
4. Select a suitable company form and motivate your decision.
5. What does it take to join an incubator? (<https://foretagsfabriken.se/starta-foretag-i-kronoberg/starta-foretag-i-vaxjo-kommun/>)
6. The **filled in form** is part of the deliverables of this assignment.

Building on what you learned during Assignment 1 create a demo and presentation of your business idea. If needed update/detail the existing documentation of your idea and business model.

Then:

7. Create a demo (Mock-up, “Paper” prototype, PowerPoint, Video) demonstrating your product/service to the investor. Be rather visionary and focus on the core, than being feature complete. Inspire!
8. Create a presentation you can show to the investor. The presentation should have the following sections:
 - a. Vision
 - b. Customer Problem and Needs
 - c. Solution
 - d. Team (Name, Role, and Picture)
 - e. Goals for Marketing and Sales Strategy
 - f. Business Model
 - g. Development Phase and Validation (do you have a first customer? KPIs, etc.)
 - i. Capital Need and Use
 - j. Exit Strategy

Note: Assignment 1 is input to the presentation and will help you answer questions after the presentation.

Summary of Deliverables

1. Include the filled in company registration form and a short report motivating your decision on choosing the company form and summarize how to join an incubator (what are the prerequisites?).
2. Pitch deck for investors.
 - a. Presentation
 - i. Vision
 - ii. Customer Problem and Needs
 - iii. Solution
 - iv. Team
 - v. Goals for Marketing and Sales Strategy
 - vi. Business Model
 - vii. Development Phase and Validation
 - viii. Competition
 - ix. Capital Need and Use
 - x. Exit Strategy
 - b. Demo
 - i. Mock-up or PowerPoint or video, “paper” prototype
 - ii. Be able to convey the idea/vision
 - iii. Inspire!

Presentation

1. Presentation and Demo 10 min
2. Questions from investors.

Submission

Submit your presentation and demo materials on the My Moodle course page using the submission link of Assignment 2 (group submission, one person uploads for group).
